

Secure power for Dubai International Airport

Case study:

- **Site:**
Dubai airport
- **Application:**
New terminal
- **Chloride products used:**
 - 512+ 70/80/90-NET UPS
 - ~14 MVA of power protection. Largest concentration of 3-ph UPS in Middle East
 - Central monitoring system for UPS
- **Country:** Dubai

The project:

End user: **Dubai International Airport**

- New airport terminal requiring a massive amount of power protection to be distributed across site
- End customer only willing to speak to premier UPS manufacturers who could supply and maintain volumes of UPS equipment, plus offer a customised solution to manage the UPS infrastructure

Chloride's scope of supply

- ▶ Needed to sell end-customer & MEP Contractor that Chloride is capable for contract of this size and has suitable connectivity solution
- ▶ Visit to end customer and subsequent software development work so that Chloride ME & Business Partner would be allowed to bid UPS contract
- ▶ Order for 512+ UPS and connectivity
